

# Digitize Wound Management

Make evidence-based care decisions with smartphone-powered wound management. Speed up documentation, take clinically accurate measurements, and track wound healing over time.

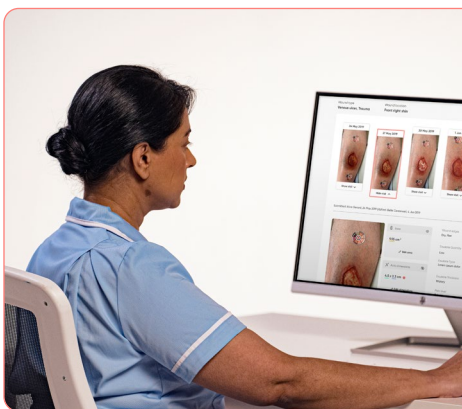

## 1 Scan

Capture a complete, consistent, and comprehensive 3D wound scan using your smartphone and two color calibration stickers.

## 2 Assess

Make better care decisions with more accurate and standardized wound assessment, including measurements, location, tissue distribution, and pain level.

## 3 Monitor

Track healing over time from a centralized portal. Gain full visibility to historical wound data and patient information. Receive analytics reports and alerts for stagnating wounds.

**"It has allowed our team to better understand wound progression in our patient population, and has helped our compliance with all LCD documentation guidelines."**

**Mikel D. Daniels**

DPM, MBA President and Chief Medical Officer, WeTreatFeet Podiatry

## Standardized data collection

No more subjective wound assessments. Digital wound management provides you with a consistent, standardized record of wound data to support clinical decision-making.

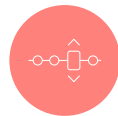

## Documentation that works for you

Reduce documentation time by 85%<sup>1</sup>, maximizing valuable time with patients. Complete and accurate documentation lets you file claims faster and get the reimbursements you deserve.

## Real-time wound insights

Centralize wound data into a secure, single source of truth that's visible to all members of the care team—anytime, anywhere. Improve workflow efficiency and coordinate care to identify complications and intervene earlier.

## Track progress and improve outcomes

Get the complete picture of every patient. Wound progression data is stored centrally so care teams can easily track healing and determine the most appropriate treatment.

## A New Standard for Wound Care

- ✓ Computer vision technology analyzes wounds with optimal accuracy
- ✓ Automatic image and color calibration ensures standardized assessment
- ✓ Smartphone-powered—no other equipment required
- ✓ Fits seamlessly into your existing clinical workflow
- ✓ Fully customizable solution—integrates with your electronic record
- ✓ FDA registered, HIPAA compliant; follows industry standards for privacy and safety

1. Average time a user spends using Healthy.io's system compared to average time a user spends without the system based on clinician input.
